10. TELECOMMUNICATIONS STRUCTURES.

The purpose of this resolution is to establish general guidelines for the siting of wireless communication towers and antennas, commercial radio and television towers. The goals of this resolution are to (1) protect residential areas and land uses from potential adverse impacts of towers and antennas; (2) encourage the location of towers in non-residential areas; (3) minimize the total number of towers throughout the community; (4) and, strongly encourage the joint use of new and existing tower sites as a primary option rather than construction of additional single-use towers.

Construction and operation of a telecommunications structure will be allowed within the Industrial (I-1), Commercial (C-1) Zoning districts and will be allowed as a special exception in the Agricultural (A-1) district.

Telecommunication Structures are not allowed within the county unless within a permitted zone, and, where allowed, are subject to the following requirements:

I. Wireless Communication Facilities and Antenna Arrays

1. Applicability

All new towers or antennas as defined by this resolution within Cannon County shall be subject to these regulations, except as follows:

- a. Preexisting towers and preexisting antennas shall not be required to meet this resolution, other than the requirements of state and federal regulations.
- b. Antennas or towers located on property owned, leased, or otherwise controlled by the governing authority shall be exempt from the requirements of this resolution, provided a license or lease authorizing such antenna or tower has been reviewed and approved by the governing authority.

2. Requirements

Each applicant for an antenna and/or tower shall provide to the Cannon County Codes Compliance Officer, the following:

- a. Engineering Report – Prepared by a professional engineer licensed by the State of Tennessee describing the height and design of the tower, demonstrating the tower’s compliance with applicable structural standards, and all building, electric and fire codes; and describing the tower’s capacity, including the number and type of antennas it can accommodate. When an antenna is proposed to be mounted on an existing structure, the report shall indicate the existing structure’s suitability and capability to accept the antenna and the proposed method for affixing the antenna to the structure. Complete details of all fixtures and couplings and the precise point of attachment shall be indicated.

- b. Written Report – That adequately reports on the inventory of existing towers and antenna sites within a one-mile (1-mile) radius from the proposed site, outlining the opportunities for shared use as an alternative to the proposed use. The applicant must illustrate that the proposed tower or antenna cannot be accommodated on an existing approved tower or facility due to one or more of the following reasons:
- (1) Unwillingness of the owner to share the facility.
 - (2) The equipment would exceed the structural cap of the existing approved tower and facilities.
 - (3) The planned equipment would cause frequency interference with other existing or planned equipment, which cannot be reasonably prevented.
 - (4) Existing or approved towers or facilities do not have space on which proposed equipment can be placed so it can function effectively.
 - (5) Other reasons make it impractical to place the proposed equipment by the applicant on existing towers or facilities.
- c. Setbacks—The minimum setbacks on all sides shall be equal to 1.5 times the height of the tower, including any antennas or appurtenances, as measured from ground level. This setback shall be considered a fall zone. The fall zone setback requirement may be reduced or waived provided it can be demonstrated in a report prepared by a professional engineer licensed in the State of Tennessee that the communication tower will collapse if it falls and it is determined by administrative review that the tower does not pose a safety threat to adjacent property owners in the event of collapse. In such cases, the setback shall be equal to the distance specified in the engineer report or a minimum of fifty (50) feet, whichever is greater. In addition no communication tower shall be located closer than two hundred and fifty (250) feet from an existing residential structure. Setbacks shall be measured from the base of the tower, or guy-wire supports for lattice towers, to the property line. For ground structure associated with the tower and located at the same site the minimum setback on all sides shall be fifty (50) feet.

II. Fees

A non-refundable fee of one thousand (\$1,000) dollars must accompany any site plan submitted for purposes of securing a zoning compliance permit under the terms of this Resolution. The fee will cover all engineering and other costs associated with the review of a site plan request for a communication tower.

III. Variations

The Cannon County Board of Zoning Appeals will serve as the appellate body for requests for variations from the terms of this Resolution. In considering variation requests, the Board of Appeals will give due consideration to the reasons stated for

the request, but will also adhere as closely as possible to the requirements of this Resolution in terms of height, setback, or other standards. The feasibility of shared use for a new tower request will be handled at the time of the request through the site plan approval process.
